# Photometric
Data Conversion

PROGRAM FEATURES

- Useful where your lighting software will not read the photometric i-table data for a particular luminaire you wish to use eg. AGI32 won't read CIE/SAASTAN format; some road lighting software won't read IESNA format.

- Separate programs are currently available to convert photometric data for:-

    North American IES   to   CIE/SAASTAN
    CIE/SAASTAN   to   North American IES

- Photometric data directly read from disk file and output to another disk file for quick and easy conversion

- Able to select multiple files for processing files quickly

- Descriptive elements in output file are in many cases user selectable

- Context sensitive Help available in program

- User manual provided

COMPUTER SYSTEM REQUIREMENTS

- IBM compatible PC running Windows XP, Vista or Windows 7

- Supported on 32bit and 64bit PC operating systems

G Palmer Trading as: QRBN BN18004477 ABN 20 274 265 715
